

Forest Scavenger Hunt

Spruce Bark Beetles & Changing Forests

- Three different kinds of trees
- A Lutz Spruce cone
- A Western Hemlock cone
- A hole left by a woodpecker
- A deadfall spruce tree
- A spruce snag (standing dead tree)
- A nurse log (plants growing on a rotting log or stump)
- Evidence of an animal living on a spruce deadfall, snag, or nurse log
- A young spruce sapling
- A beetle gallery in spruce bark
- A shelf fungus (butt-rot!)
- Three unique smells
- A squirrel midden
- Three clues that humans have influenced the forest
- Something you think other groups haven't found
